paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 289 Language: Simplified Chinese Publisher: Zhengzhou University Press; 1st edition (May 1. 2007). University physics tutorials (Vol.2) is based on the basis of teaching of the Steering Committee of the Ministry of Education written for the development of science and engineering college physics course teaching the basic requirements. In the preparation. the tutorial does not follow the traditional methods. instead of using a new structural system to introduce the teaching of university physics. from the level of the structure of matter. with particular emphasis on the level from the motion of matter as well as field and the wave point of view to explore the physics the law. This tutorial is divided into two. University Physics tutorial (Vol.2) for the next book. a total of three sections: a large number of law of motion of the particle system. Including by means of statistical methods to establish the thermal motion of the microscopic theory of molecular kinetic theory of thermodynamics of macroscopic theory based on experimental observation. reasoning. as well as established according to the continuum model and Newton's laws of fluid mechanics. fully demonstrating the complexity of many-particle system and the diversity of research methods; the basis of fluctuations in physics. mechanical wave theory. and then study the interference of light. diffraction and polarization. and matter waves. lays out a variety of images of fluctuations; the microscopic structure of matter and its law of motion. concise a brief introduction to the modern quantum theory. nuclear physics and particle physics and solid state physics. In addition. the tutorial listed in the end of the university physics tutorials (Vol.2) on the next volume of problem sets. with the...
