Brand New Book ***** Print on Demand *****.Excerpt from The Laws of Algebra, an Elementary Course in Algebraic Theory It has long been acknowledged that there is great need of an elementary account of the Laws of Algebra suitable for use in the senior classes of schools. The object of this little book is to meet that need: it makes, therefore, no pretence of expounding new ideas, but aims at a clear and simple statement of the rudiments of algebraic theory. The recognised methods of teaching algebra in schools assume rightly that Formal Algebra and the Theory of Numbers are university subjects and quite beyond the mental range of the school boy. For this reason the various principles involved in algebraic methods are either demonstrated empirically or justified by various illustrations mostly of a geometrical nature. In dealing with beginners this is inevitable. The danger is that the fundamental principles may remain for ever buried under the illustrations or distorted by irrelevant considerations. Many schoolboy will - with the full approval of his conscience - prove that $a(b + c) - ab + ac...$
